FAIZAN MEMON

Sales & Business Development | AI Solutions | SaaS & Custom Software

Ahmedabad, Gujarat, India | memonfaizan7860@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Technology sales and business development professional with a background in AI/ML engineering, full-stack development, and client-facing project delivery. Currently leading sales and business development at Pelquant, working with clients to identify business needs, scope AI and software solutions, prepare proposals, and coordinate projects through delivery. Previously built an independent IT solutions practice with 5+ live client deployments, managing client acquisition, requirements discovery, solution planning, development coordination, and post-launch support. Combines technical understanding with consultative selling to translate business challenges into practical technology solutions across AI automation, custom software, web and mobile applications, and digital growth services.

PROFESSIONAL EXPERIENCE

Pelquant | Head of Sales – Business Development, Sales & Project Management

Ahmedabad, Gujarat, India | September 2026 – Present

- Lead sales and business development activities for AI, custom software, design, and digital growth solutions.
- Manage the sales cycle from initial client conversations and requirements discovery through solution scoping, proposals, and contract discussions.
- Identify business needs and align prospective clients with suitable AI automation, web and mobile development, UI/UX, branding, and marketing services.
- Develop solution approaches for clients across industries including FinTech, HealthTech, PropTech, EdTech, LegalTech, Logistics, and E-commerce.
- Coordinate with clients and technical delivery teams to clarify requirements, manage scope and timelines, and maintain alignment through project delivery.
- Support client relationships across 5+ countries, helping translate business objectives into practical technology solutions.

Freelance | Independent AI & Technology Solutions Consultant | Business Development & Project Management

Ahmedabad, Gujarat, India | June 2024 – September 2026

- Built an independent IT solutions practice from the ground up, resulting in 5+ live client deployments across web development and technology solutions.
- Managed the client lifecycle from lead acquisition and requirements discovery through solution scoping, development, deployment, and post-launch support.
- Delivered 5+ full-stack web projects using technologies including Laravel, React, and Django, translating business requirements into functional digital products.
- Delivered 3+ e-commerce platforms using Shopify and custom technology stacks, aligning platform functionality with client business needs.
- Identified automation opportunities across 3+ client businesses and worked on chatbots, workflow automation, triggers, and intelligent integrations to reduce manual processes.
- Supported client growth initiatives through technology consulting, SEO, social media, digital strategy, and paid marketing services across 4+ industries.
- Built client relationships through consultative problem-solving, clear communication, and coordination between business requirements and technical execution.

Cognisun Inc. | AI/ML Intern

Ahmedabad, Gujarat, India | January 2025 – November 2025

- Contributed to the development of a live commercial CRM product using Python, Flask, React, and SQL.
- Worked on integrating deep learning models built with TensorFlow into product modules to support AI-powered capabilities.
- Developed and integrated REST APIs to support application functionality and communication between system components.
- Worked with SQL and stored procedures to support data-intensive backend operations and improve application responsiveness.
- Collaborated with the product development team to translate technical requirements into functional features for a production software environment.

Streebo | Graphic Designer & Web Designer

Ahmedabad, Gujarat, India | March 2023 – May 2024

- Designed UI prototypes and interaction flows in Figma for digital platforms, supporting design-to-development handoffs.
- Created brand identities, social media creatives, and website layouts for client-facing digital experiences.
- Translated design concepts into responsive web interfaces using HTML, CSS, and Bootstrap.
- Collaborated across design and development workflows to align visual design with product and client requirements.

Noble Academy | Assistant Manager

Ahmedabad, Gujarat, India | September 2021 – December 2022

- Coordinated daily operations across departments, helping teams stay aligned on priorities and operational requirements.
- Supported process improvements and internal reporting workflows through scripting and process redesign.
- Maintained process documentation and supported consistent execution of day-to-day activities.
- Developed experience in team coordination, stakeholder communication, and operational management.

EDUCATION

LJ University, Ahmedabad

Integrated Master of Computer Applications (IMCA) – Computer Software Engineering | October 2021 – May 2026
